

Another Year of Great Service!

A WISER, SAFER CHOICE!

NORTHSTAR ELECTRICAL SERVICES

PENNSYLVANIA * NEW JERSEY * DELAWARE

CELEBRATING 20 YEARS!

Northstar Electrical Services, Inc. started operations in 1997. The President and Owner, Bill Tuteurice, started out as a young electrician working for another company. He quickly realized that with a little hard work he could earn a master's license and open his own company.

It started out of a small garage with customers he directly solicited. Many of those customers we still have today. Bill began to get busier and needed to hire helpers.

Bill purchased a building and began developing a company with employees and a stronger customer base. The

building was renovated into a larger office and staffed with office personnel and company vehicles were purchased.

Northstar is now known regionally as one of the most professional commercial electrical and sign service companies available. We are paperless, have coordinators for different projects

and services, and several technicians with master's licenses of their own.

Our customers created us and we appreciate them immensely. Without the support of our customers, vendors, staff, and other business associates we would not be the amazing company we are today.

We thank each of you for your help in getting us to 20 years of fulfilling business relationships and we look forward 20 plus more!

"We have to do more than help people see the logic with their minds. It's also about making them feel it in their bones. Viscerally. Emotionally. This is what changes us; this is what makes us act." - *Emma Watson*
