### April is Distracted Driving Awareness Month!

In today's world, everything is go-go-go and we're all trying to multi-task to make the best use of our time. Unfortunately, that takes place in the car for many people. Every day at least 9 Americans die and 100 are injured in distracted driving crashes.

While there are many forms of distracted driving, possibly the most prevalent and preventable one is using an electronic device while driving.

To prevent tragedies due to distracted driving, motorists are urged to:

- turn off electronic devices and put them out of reach before starting to drive
- be good role models for younger drivers
- speak up when you are a passenger and your driver is using an electronic device while driving
- always wear your seatbelt
- if you are using a device for navigation, mount it to the dashboard/vent so you are less likely to use it for other things that may pop up—some states even require this by law now!
- if you have passengers, enlist their help so that you can focus on the road

-if there's really something that just can't wait, pull off of the road to address it once your vehicle is in a safe place

These tips also apply to those not in vehicles—bicyclists and pedestrians need to also be aware of their surroundings when they are traveling near/on roadways.

Northstar always promotes vehicle safety!
